## Mirror States

**They are called Mirror States; for they draw part or whole numbers of another state regardless of geography, just like a Mirror Image.**

Each state can be a **Leader** and get the number drawn first, or a **Follower** and get the same number later, but even if they do not play by the rules all the time; it is a concept that can be used to narrow your Play List; which is good news for the wallet .

It is tested by me and others, and I found it to be true to form on many occasions:

State

First Choice

Second Choice

Atlantic

CO-ME-OR

FL-MN-SD
